Subject: (174160609) Region 7 West Lake Landfill Question(s)

---

Name  
Agnes Uhls  
Question

Both the levee and the random high radioactive water samples are no guarantee that radioactive waste is stable in its elevated position in West Lake landfill. Once the radioactive material reaches the water table, the levee gives no protection to groundwater movement toward the Missouri River. Why does the EPA not address the situation at West Lake of ultimate groundwater contamination?
